

The New Standard for Multi-Asset Intelligence

AI-powered trading infrastructure for crypto and real-world assets.

"To bring the precision of institutional trading and the permanence of real-world assets to every investor — powered by adaptive AI, verified through on-chain transparency, and engineered to thrive in the evolving global economy."

"Built for the investors that Wall Street forgot."

Cardano-first. Chain-agnostic by design.

\$23.6B

Tokenized RWAs on-chain (Mar 2026)

\$2T

Projected RWA market by 2030 (McKinsey)

\$50.4B

AI trading market by 2033

66%

RWA YTD growth 2026

AURYX Platform

The AI-powered multi-asset trading platform at the center of PreciousAI — trading crypto today, expanding into real-world assets tomorrow, and intelligently rebalancing across all of them.

Alpha Router

Intelligent trade routing across multiple liquidity venues. Optimizes for price, speed, and cost in real time.

Signal Fusion

Multi-source intelligence synthesis combining on-chain data, sentiment, and macro signals into unified trading signals.

Self-Healing Intelligence

Adaptive strategy layer that detects drift, adjusts parameters, and evolves without manual intervention.

Product Roadmap

PHASE 1 — In Testing • April 2026

AURYX MVP

AI-powered crypto trading with Alpha Router, Signal Fusion, and Self-Healing Intelligence on Cardano.

PHASE 2 — Planned • Post-MVP

Sovereign Reserve

Tokenized gold, silver, platinum. 1:1 backed, audited quarterly, tradeable through AURYX.

PHASE 3 — Future

TerraFund

On-chain carbon credit markets with transparent verification. Expanding multi-asset vision into climate accountability.

■ **Cross-Asset Rebalancing:** As each phase launches, AURYX rebalances across all asset classes.

Why PreciousAI

Unoccupied intersection — No competitor combines AI trading + multi-asset coverage (crypto, metals, carbon) in one platform.

Real assets, not speculation — Tokenized gold, silver, platinum, and carbon credits alongside digital assets.

On-chain transparency — Every trade executed and settled on Cardano. Auditable systems, no black boxes.

Zero-Hype, All-Substance — No false metrics. No inflated claims. Transparent progress toward ambitious goals.

Unified ecosystem token — One token for staking, governance, vault access, and fee incentives across all products.
